Introduction from Nigel Paul, Chair APUC

On behalf of the Board of APUC Limited, I am delighted to again introduce APUC’s Annual Report, this time for the year 2012-13.

This year has again been one containing substantial development for the sector and APUC, and also substantial achievement.

Starting with the latter, the proportion of sector spend reported during the year going through collaborative agreements rose to circa 28% (a 47% increase) as reported for the 2011/12 year with benefits reported for the year being circa £15m from collaborative contracting alone (2012/13 data is being validated currently and will be reported during the 2013/14 year). There are now 16 institutions benefiting from local shared services arrangements, and the College Services team continue to provide expertise and benefit to Colleges. Good progress was demonstrated in the fourth round of the Procurement Capability Assessment programme with 78% now in the Improved and Superior categories.

The Procurement Reform Bill commenced its consultation phase in the reporting year and APUC, representing the sector, was in ongoing dialogue with the Scottish Government to ensure that the HE/FE sector’s inputs were duly considered.

The Scottish Government also launched a review of Construction Procurement across publicly funded sectors in early 2013. This was due to report its findings in Q4/2013. APUC worked in partnership with the Procurement Strategy Group and the Scottish Association of University Directors of Estates to effectively represent the position of the University and College sectors.

The college merger programme progressed significantly in the year with the formation of Edinburgh College and SRUC in October 2012. A further 4 new colleges (Ayrshire, West College Scotland, Fife and Glasgow Clyde) completed their governance related merger activities in readiness for launch in August 2013. These 6 merged institutions replaced a total of 17 former colleges.

On top of the merger activities, it also became clear that the Office of National Statistics was reclassifying incorporated FE Colleges as general / central government bodies. This brings a significant change to the reporting and related management activities in affected Colleges. APUC has worked with the College sector and the Scottish Government to understand the procurement related impacts of the reclassification. After dialogue, APUC was able to confirm that the College sector will not have to comply with the much lower central government body EU tender threshold and can continue to operate to the current higher limits. It was also confirmed that the College sector will continue to be aligned to APUC as their Centre of (procurement) Expertise.

During the year, APUC’s Performance Review and Development process was fully embedded. The review procedure measures staff performance against the objectives of the Strategic Plan which is regularly updated to align with the developing requirements of the sector.

A web-portal tool was launched to provide a facility for suppliers to electronically input all collaborative contract spend. This was linked to APUC’s Hunter contract management tool and is speeding up the Management Information gathering process.

The Strategic Category work streams were expanded to cover new categories of HR, Laboratories and Library. The original spend categories moved ahead with the implementation of both the Estates Category Strategy and the ICT Category Strategy. Strategies for the new categories are due to be published during 2013/14.

APUC continues to work closely with its client community to optimise the service that it offers. Angus Warren, the Chief Executive, and senior managers continued with regular stakeholder engagement, and the annual Contracting Priorities Workshop, Procurement Network Workshops, and Strategy Group meetings were all well supported.

A Client Satisfaction Survey was conducted in 2012/13 and overall feedback was positive indicating that APUC is working very well in delivering desired outcomes.

APUC has continued to achieve considerable success for the sectors by working closely with its client institutions and, with them, forming a highly focussed collective team. I would like to extend my thanks to all institutional staff involved in procurement activity and to all staff in APUC for this outstanding example of sustained and highly productive collaboration.

I should also like to convey my warm thanks to my colleagues on the APUC Board whose guidance and support for the development of APUC has been, and continues to be, extremely valuable and is much appreciated by the management team.

The 2012-13 Financial Statements and associated reports are available on the APUC website at www.apuc-scot.ac.uk/corpinf.htm
### Summary of key actions and achievements August 2012 – July 2013

<table>
<thead>
<tr>
<th>Area</th>
<th>Key actions and achievements</th>
</tr>
</thead>
</table>
| **Operations**                                 | • Performance Review and Development process now embedded and being routinely used to measured staff performance against the Strategic Plan Objectives  
• Institutionally based procurement shared service resources now in place for 16 institutions.  
• APUC providing continued support to merging colleges to ensure effective procurement is in place for the planned organisations.  
• Managed sector inputs to the consultation phase of the Procurement Reform Bill                                                                                                                                                                                                             |
| **Client Engagement**                          | • Chief Executive meeting with all institutions at least annually.  
• Senior managers also meeting with institutions on a regular basis.  
• Client Satisfaction Survey conducted in 2012/13 with overall positive feedback.  
• Client account management model continues to be well received by institutions and is producing impressive results and attracting interest from other sectors.  
• Significant cost savings for colleges continued to be achieved through support for tender preparation.                                                                                                                                                                                                 |
| **Operational Procurement**                   | • 138 contracts available at the end of the year to institutions valued at £305M.  
• New Strategic Category work streams established for HR, Laboratories and Libraries.  
• Equipment Database and Maintenance (EDAM) online resource launched and web interface commissioned.  
• The percentage of sector spend going through collaborative agreements as reported in 2012/13 (for 2011/12 data) has increased by 47% to 28% (2012/13 data will be reported during the 2013/14 year)                                                                 |
| **Sustainable Supply Chain**                  | • Sustainable supply chain development project established and Supply Chain Sustainability Policy, Supply Chain Review and Audit Strategy and Supply Chain Suppliers Code of Conduct created                                                                                                                                                           |
| **Benefits Tracking**                          | • Benefits from collaborative contracting alone reported in the year (based on 2011/12 spend) was £15m.  
• Spend on collaborative contracts by the sector for the 2012/13 year (subject to validation) was £204.6M an increase of 22.5% over the previous year.                                                                                                                                                                   |
| **eSolutions**                                 | • All institutions were supported on use of e-procurement related solutions  
• Hunter database installed in 26 institutions including all purchasing consortia and further installations planned  
• UKUPC Supplier MI website rolled out to all APUC Agreement Suppliers  
• Collaborative Content Management (CCM) system went live in September 2012 with all APUC catalogue content available  
• APUC trained institutions in the use of the PCS-T system                                                                                                                                                                                                                          |
| **Process and Best Practice**                 | • Annual review of procurement training and development needs.  
• Training Plan for institutions maintained.  
• Fourth round of Procurement Capability Assessments (PCA) (including a “Lite” version for smaller institutions) completed with significant improvements achieved.  
• APUC’s PCA was conducted in September by the Scottish Government and a ‘Superior Category’ rating was achieved                                                                                                                                                                                                 |

Highlights of operational & strategic activities
August 2012 - July 2013

General
A totally aligned Performance Review and Development process is now being used to drive progress against the Strategic Plan.

Sector inputs to the consultation stage of the Procurement Reform Bill were collated with APUC’s assessment and presented to government by APUC on behalf of the sector.

College Services
As agreed by the sector, a Head of College Services to oversee the activities of the team was appointed in August 2012. This was not a new FTE but instead a variation to an existing management resource.

The total number of contracts supported by the college services team in the year by the end of July 2013 was as follows:

- Contracted: 34
- total value: £5.9M
- number of colleges: 16
- savings over: £1.2m

A further 48 were in progress (£24.3M) and 96 planned (£5.5M) across 26 colleges.

The team also continued to provide support for merging institutions.

Sustainable Supply Chain Development Programme
A sustainable supply chain development project was established and moved ahead significantly during the year. A new Supply Chain Sustainability Policy, Supply Chain Review and Audit Strategy and Supply Chain Suppliers Code of Conduct were created in conjunction with a review group made up of APUC and Edinburgh and Aberdeen University staff, with students from Aberdeen and Edinburgh which included representatives from the NUS and People and Planet. Input was also gathered from the APUC Strategy Groups. A questionnaire, driven by the code of conduct content, was then developed and build of a website started (due early 2014) to enable suppliers to be assessed at an initial level in an automated manner which will allow risks to be assessed and the appropriate follow on actions to be established. UUK are aware of this project and are following it with interest.

A Management Trainee programme was also established with three trainees initially spending time in APUC, then moving on to gain work experience at the universities and colleges.

Governance
At the APUC Annual General Meeting in May 2013, University sector representative Pat Briggs, Robert Gordon University finished her time on the Board and, prior to the AGM, Gerry Webber, Edinburgh Napier University, was elected to take her place. The appointment was confirmed by election as part of the AGM formalities. The three non-sectoral Directors, David Ross, Stuart Paterson and Douglas MacKellar also remain in office, and are now on a 3 year appointment cycle (as per sector directors) allowing for majority continuity in the event of routine change of appointees.

Procurement Capability Assessments (PCAs)
Following on from a year where a number of institutions had exemptions (through high scores being achieved in the previous years) of assessments in 2011, all but seven in-scope institutions in Scotland received a PCA in 2012.

The 2012 assessment results showed a healthy overall improvement from those obtained in 2011. Some of the key findings to note are:

1. The average score for all institutions increased from 52% to 58% moving the average score further into the ‘Improved’ category of assessment.
2. There are now 3 institutions in the ‘Superior’ category
3. There are now no institutions in the ‘Non-Conformance’ category.

The positive progress achieved demonstrates that the university and college sectors in Scotland have made very good progress in improving procurement capability.

Most institutions are actively exploring ways in which they can drive further improvements.

Given the changes and financial pressures that are impacting upon the sectors it is important that all institutions remain fully engaged with the PCA programme so that they may continue to secure measurable value for money improvements through the delivery of procurement reform and enhanced procurement capability.

A workshop was held in March 2013 to review the 2012 PCA results and highlight any areas for further improvement going forward, as well as to share best practice between institutions.

A refined PCA has been developed for use in the fifth round and the sector is expected to continue its good progress towards a steady state of procurement capability excellence.

The PCA results for the HE/FE sector, showing the improvements achieved, are set out on the following page.
Fig 1 - Collaborative Contracts available with Buyers’ Guides

- Apple Agreement
